

EMA Finland and Industriflyg in cooperation - air ambulance

Industriflyg's Special Missions are conducted with medical crew and expertise from EMA Finland

The medical service has been refined through years of collecting experience in the field of aeromedical repatriations and evacuations globally, handling demanding cases and customer feedback. We subscribe to highest possible standards in the industry: Medical crew holds the quality certificates of European Air Medical Institute (EURAMI) and ISO 9001:2015. Work and patient care are guided by national and international regulations, and we strive to continuously develop our practices.

Industriflyg long experience with medievac

Industriflyg has for the past 5 years supplied the Swedish military with medievacs. We have experience operating into conflict areas which requires extra planning with authorities, security considerations and insurance companies.

EMA Finland and Industriflyg provide a unique concept with medical staff, equipment and long range aircraft capable of delivering complex medical transport around the world. Tailored for each mission to make safe and well-coordinated flights for all kind of patients.
